

Ashton Ang Wu Zun

Network & Cybersecurity Student

Singapore · ashtonang77@gmail.com · github.com/HappyCPPD · linkedin.com/in/ashton-ang-wu-zun

SUMMARY

Second-year Higher Nitec Network & Cyber Security student at ITE Singapore. I build small security and networking tools in Python: log analysis, host and port discovery, and socket programming. I also have hands-on experience with server deployment and client-server networking, and I am looking for a cybersecurity, network, or systems administration internship where I can keep building and learning.

TECHNICAL SKILLS

Security & Networking	Log analysis and triage, host/port discovery, TCP/IP, client-server networking, server deployment, SSH
Programming	Python, Bash (familiar: JavaScript, SQL, Java, C#, C++)
Tools & Platforms	Linux, Git & GitHub, regular expressions

PROJECTS

SSH Failed Login Analyzer Python · Regex · Log parsing

Reads a Linux auth.log, extracts the IPv4 address from every “Failed password” entry with a regex, and ranks the IPs by failed-attempt count so brute-force sources surface immediately for triage. github.com/HappyCPPD/AuthLogReader

Subnet Scanner Python · Networking

Command-line host and port discovery: takes a subnet in CIDR notation, pings every address to find live hosts, then opens short-lived TCP connections to common ports (SSH, HTTP, HTTPS, SMB, RDP). Built entirely on the Python standard library, it scans a full subnet in seconds. github.com/HappyCPPD/Subnet-Scanner

LAN Chat Room Python · Sockets

A console chat application with a Python socket server that accepts multiple clients over a local network and relays messages between them. It was my first hands-on socket programming project. github.com/HappyCPPD/python-chat-room

EXPERIENCE

Freelance Tools Developer Self-employed · 2020 – Present

Design, build, and sell custom Discord bots and game-automation tools to paying customers; gather requirements, ship, and provide ongoing support.

Courier & Package Handler QuickMove · Apr 2023 – Jun 2025

Sorted and moved parcels across shifts while studying full-time, balancing reliable work with coursework.

EDUCATION

Institute of Technical Education (ITE), Singapore Jan 2025 – Jan 2028

Higher Nitec in Network & Cyber Security

Jurong West Secondary School 2021

GCE N(T)-Level

CERTIFICATIONS & LANGUAGES

Fortinet: Certified Fundamentals (FCF) in Cybersecurity

Fortinet: Technical Introduction to Cybersecurity 1.0

Google: Foundations of Cybersecurity

Google: Put It to Work: Prepare for Cybersecurity Jobs

Languages: English (professional working), Thai (elementary)
